

SIZE: A=85mm
B=140mm
C=85mm

According to the plan size fixed at the door to the top plate

SIZE: A=85mm
B=140mm
C=85mm

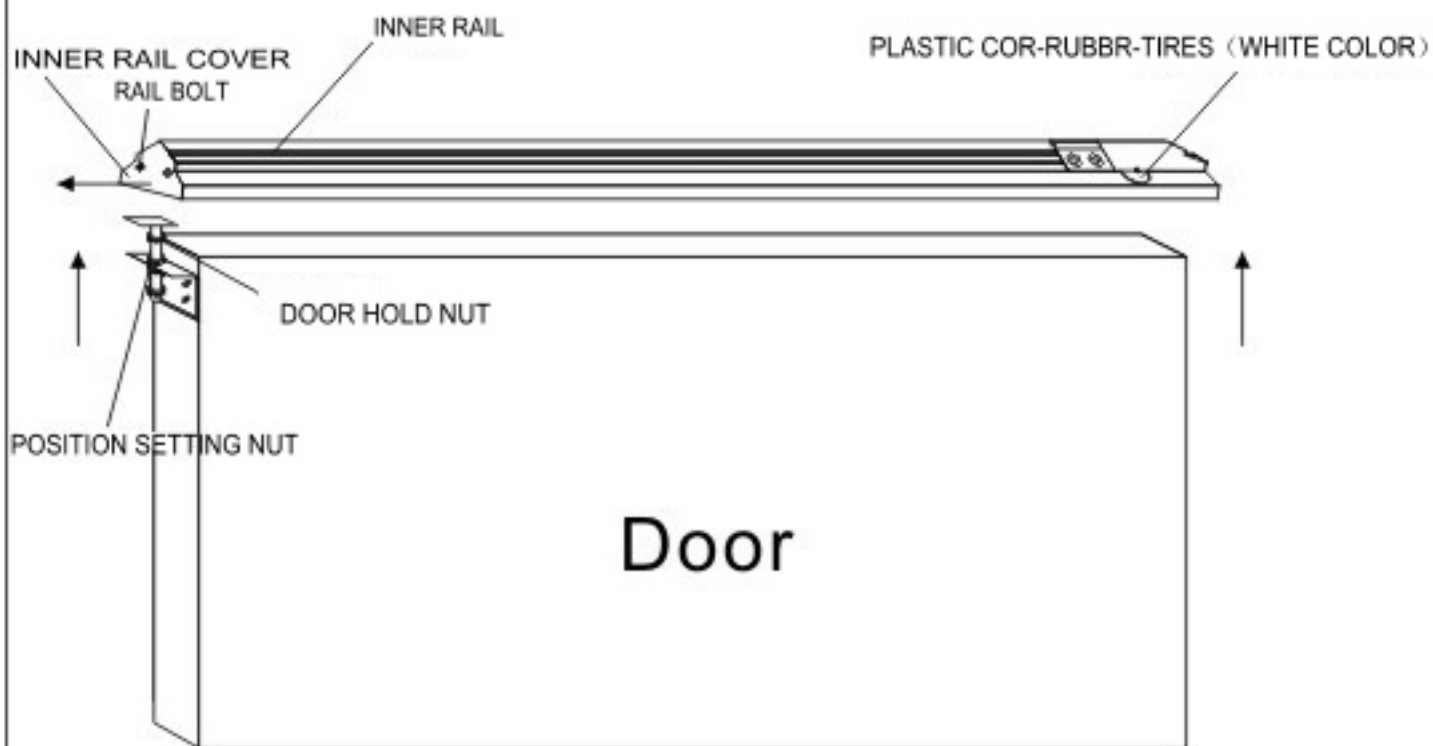

Installation Step

1. According to the drawing, make the right position for the Outer Rail. (We have make the holes)
2. Put the Outer Rail to the position and lock the bolts to hold it.

Installation Step

1. Try the Inner Rail can roll into the Outer Rail. Here notice the white color Plastic core-rubber-tires. It should be on the Hook.
2. When the Inner Rail sure to can be roll into the Outer Rail, put it down and we do the next step.

Door

Installation Step

1. Take out the Rail Bolt From the Inner Rail Cover and then take out the Inner Rail Cover.
2. Lock the Inner Rail on the Door by the Door Hold Nut.
3. Put the Inner Rail with the door in to the Outer Rail. Be careful now, the door is very heavy that we should do it for 3-5 person. And please be sure the safety.
4. Set the Position Setting Nut to set the vertical and the horizontal position of the door.
5. Cover the Inner Rail Cover onto the Inner Rail and lock the Rail Bolt.
